

It's Official. All New And Remodeled Homes Must Incorporate Solar.

“There are 350,000 customers annually that will see the acquisition of solar as a normal part of their home transaction.”

It's an historic moment for clean energy!

Starting in 2020, virtually all new homes in California will be required to incorporate advanced efficiency measures and rooftop solar-in an historic development for clean energy in the state. Updates to the Title 24 standards are projected to reduce home energy use by 53 percent compared to the current code, saving Californians \$1.7 BILLION in energy costs over the next 30 years.

The California Energy Commission (CEC) voted unanimously to adopt the policy as part of the state's Building Energy Efficiency Standards.

THE NEW RULES APPLY SPECIFICALLY TO ALL NEW RESIDENCES AND MAJOR HOME RENOVATIONS ON BUILDINGS UNDER THREE STORIES, STARTING ON JANUARY 1, 2020.
